

Refrigeration Pressure Gauge

Refrigeration Pressure Gauge

- ◆ 100mm (4") Dial Size
- ◆ Stainless Steel Case & Ring
- ◆ SS Internals
- ◆ Liquid Filled
- ◆ Bottom Connection
- ◆ Direct or Panel or Surface Mount
- ◆ Different Thread Options
- ◆ Selectable Refrigeration Scales

Applications

These gauges are mainly used in the Refrigeration Industry to measure suction, oil, Discharge pressure on ref'n. compressors

Design Module

These gauges are glycerin filled to minimize pointer fluctuations and vibration damages. The user can select different refrigeration scales available for freon and ammonia. Also the gauge connections are available in various thread sizes as per requirement.

Specifications

Dial Size	100mm (4")
Case & Ring	SS304 IP65 Acrylic Brass or SS316
Range	-1x12 / 25 bar
Accuracy	±1% F.S.
Refrigerant	R12, R22, R134a, R502, R404a & Ammonia R717
Thread - Connection	1/4" or 3/8" or 1/2" (others on request)

Manufactured for Soluter by Adarsh

How to Order -Refrigeration Pressure Gauge

While ordering please mention the below:-

- 1) Dial Size
- 2) Pressure Range
- 3) Thread Connections
- 4) Mounting - Bottom with Direct or Panel or Surface
- 5) Refrigerant Scale - (R717 (ammonia) or R22/134a/404a or R22/502/R12),
- 6) Dry or Liquid Filled
